Complexe porcin collège McDonald

Description

The Swine Complex is a farrow to finish operation with a capacity of 48 sows. The unit was designed for teaching and research. Both the nursery and growing sections have a capacity of 192 pigs. Each section consists of 2 rooms with 16 pens each with a capacity of 6 pigs per pen. This allows replication for trials and also allows for an all in all out system of management using batch farrowing. In addition there is a metabolism room for intensive research in swine nutrition.
